F = Hole Size 0.25"

No. Of Holes 12

G = Flange Thickness 0.23

Flange Step Out 0

Flange Step In 0.05"

Step Diameter 7.60"

Your rotor may or may not have a step or steps in the face. Only fill out the required information if you have steps. We also need to know if your rotor has any options such as gas vents, cross drilling or is stress relieved.

Note: All custom rotors must have a spec sheet, blueprint or a sample part. We can not make custom rotors with sizes provided over the phone. All spec sheets must be signed and dated.
